

PRODUCT INFORMATION

MODEL ‘O’ TYPE KIT

CCMOKIT

SUMMARY

This type of torch has gained popularity and won widespread acceptance over many years of service, due to its supreme balance and ease of use. It is very manoeuvrable and generates a small, directed flame. This makes it ideal for use in precise, heat-sensitive applications – such as the electronics industry.

The Weldability Model ‘O’ type blowpipe is supplied in a boxed kit form that includes one of each of the Model ‘O’ type welding tip sizes 1 to 5. Replacement welding tips can also be purchased separately.

TARGET APPLICATIONS

The Model ‘O’ Type blowpipe is designed for very fine welding and brazing applications, including the fusion welding of thin gauge sheet metal up to 1.5mm (1/16 inch), and delicate lead welding.

FURTHER INFORMATION

Weldability also provide a range of Lightweight type gas cutting and welding equipment, and the more popular Type 3, 4 and 5 style gas equipment, which is of a heavier, more industrial design, boasting 3/8” BSP inlet connection fittings.

ARTICLES & ACCESSORIES

Part Number	Product Description
CCMOKIT	MODEL ‘O’ TYPE KIT
CCMO01	NO. 1 MODEL ‘O’ TYPE WELDING TIP
CCMO02	NO. 2 MODEL ‘O’ TYPE WELDING TIP
CCMO03	NO. 3 MODEL ‘O’ TYPE WELDING TIP
CCMO04	NO. 4 MODEL ‘O’ TYPE WELDING TIP
CCMO05	NO. 5 MODEL ‘O’ TYPE WELDING TIP
CCMO	MODEL O TORCH CARTON

TECHNICAL SPECIFICATION

This product boasts lightweight ¼” BSP inlet connection fittings.
