

High-vacuum Extraction

KEMPER®

VacuFil 125i

Many compatible extraction torches

Convenient extraction power setting via touch display for multi-manufacturer torch selection

Digitally networked

Fleet management, remote maintenance, and predictive maintenance with the help of self-sufficient cloudnetworking via mobile phone network

Non-stop operation

Suitable for high levels of smoke and dust due to automatic filter cleaning.

High extraction

integrated side channel compressor ensures a permanently high extraction power, which is infinitely adjustable on the unit

Contamination-free dust removal

No contact with health-endangering fine dust due to dust-free dust discharge

Start-Stop automatic (optional)

The link to the welding machine is saving time and energy.

Monitoring of the extraction rate

thanks to the automatic extraction rate control, the air volume flow remains constant even with increasing filter saturation
