Dual Voltage 200Amp Inverter

TSXE1D200MTS

Professional MIG welding system

for industry

The sifWELD MTS200SYN is a professional, microprocessor-controlled inverter welding power-source for MIG, MMA & Lift-TIG applications.

Using the built in Synergic facility the machine will automatically give the optimum welding parameters for the specific material, wire size and shielding gas.

featuring IGBT technology and providing a lightweight, multi-process machine. An integral wire feed system accommodates 5kg wire spools.

Main features

- 200A, Single phase MIG welding machine with power factor correction, perfect for 110V site work
- Synergic or manual settings.
- Full digital control with large colour LCD screen for showing and changing all welding parameters
- Genuine lift Tig facility, with switched internal gas valve
- High duty cycle
- Generator friendly
- 5Kg reel
