

GB CUT F3

pipe cutting machine

Standard version

Guide Band ensures accurate square cuts

Motorised plasma cutting version

A manual chain driven pipe cutting machine that provides smooth, accurate cutting action by incorporating a low gear ratio and worm gear drive. Cuts 5 - 50mm wall thickness on pipe with 114 - 600mm (4" - 24") diameter. Beveling head angle can be set quickly and accurately by scale on a rack and pinion. This complete package is supplied together with a 2.4m length of guide chain and a selection of ANM cutting tips. Solidly constructed using brass, chromed and stainless steel parts.

Pipe Diameter:	4" - 24" with standard chain Larger diameters can be cut with extra chain kits.	Standard Package: Main body + 2 handles Standard torch unit Chain (83 links) x 3 cutting tips Gas in connector Torch connector Operating manual
